

Development within our organization

We would like to inform you about a recent development within our organization. Transparency and respectful cooperation are important to us, which is why we are sharing the following message.

Press Release

In recent months, there have been several conversations between Fons, Jeroen and Erwin Lourier about different views within the organization. During these open and honest talks, it was agreed that these differences did not lead to personal blame, but did affect the working relationship to the point where continuing to work together was no longer possible.

For this reason, it was agreed by all parties that Jeroen and Erwin will no longer work for Loodet B.V. as of 1 January 2026.

Over the past years, both have made valuable contributions to the development and growth of the organization.

With mutual respect, everyone looks back on a positive cooperation and wishes each other success and all the best for the future.
